Productivity

The inherent benefits produced by cloud-computing can support several business outcomes including lowered risk, greater efficiency, improved productivity and business agility.

hatrix hosted & managed access control leverages cloud technology to make your business safer and smarter. hatrix delivers an unparalleled user experience that simplifies your security management.

hatrix' desktop and mobile applications can operate from anywhere in real-time. No software and is always up to date. Since you're no longer tied to a desk or office, business agility is greatly enhanced.

hatrix provides seamless integrations for intrusion, surveillance, tenant entry, and even touchless biometrics. As your business grows, requiring greater capabilities, our scalability and flexibility can be leveraged to meet your needs.

hatrix comes with a lower cost of entry and lower ongoing costs of ownership. hatrix managed services provides even greater efficiency, enabling you to focus more resources on core business tasks.

hatrix simplifies security management by providing one application for access control, video, intrusion, tenant entry and integrations. Seamless, powerful, and intuitive, hatrix enhances efficiency for greater productivity.

Hosted

A Managed Services Provider manages your database and hardware allowing you to administer your account from a secure desktop or mobile application.

Managed

A Managed Services Provider manages your account while providing ongoing day-to-day support. If you want to change anything, your MSP handles it all for you.
